WHEAT STORAGE — THE FARMER'S PROBLEM

PRESENT PROBLEMS are that a very large yield of wheat will be harvested during the next two months. Elevator storage is now near the full stage, and it is a certainty that before harvest proceeds very far what elevator space is left will be completely plugged.

Whatever the federal government may do as to price will not relieve the storage question. Therefore the great bulk of the grain will have to be stored on the farms.

A few farmers are in a position to meet this. More, many more are not, and their only safe guard is to build granaries sufficient to house their grain.

There will be a rush on all Lumber Yards and the wise man will be the one who places in order early. It may be there will be some difficulty in securing sufficient lumber on

STRATHMORE'S BEAUTIFUL GARDENS

Strathmore's Flower gardens are again giving forth their glorious array and variety of color form and fragrance. These and the well kept lawns Strathmore boasts are ever a delight to home people and visitors alike.

There are the specially beautiful flower gardens at the C. P. R. Headquarters, and the several homes throughout the town which are a joy to the onlooker, and Saturday last we discovered an hitherto unknown plot of lovely color in the garden of John Vermaut, a secluded corner at the back of the King Edward Hotel.

Hidden from public gaze by a high board fence the passersby is quite unaware of the plot within which yields in abundance flowers for the hotel tables and several others as well.

John finds pleasing exercise in keeping his plot weed-free, as does Jimmy Swanson whose Sweepers are among the best in town, and the shaded grassy lawn at the East side reclaimed a few years since from wilderness conditions provides a restful spot on a warm afternoon.

"A Thing of Beauty is a Joy forever."

— 1941 —

"THIS, TOO, WILL PASS"

IN THE MARITIMES where, even in peacetime, a new trouble afflicts the soul every few minutes a business man keeps a framed motto over his desk: "This, too, will pass." The war, too, will pass into history. The reason that war will pass into history was discovered by Voltaire who wrote that "The English people are people who defend themselves." They will not give up the rights that cost their streets their blood.

What sort of world, what sort of Canada, emerges from this war depends in part on the length of the conflict. But mainly the kind of country we have in the future depends on what kind of a country we strive to make it. If we drift, we shall drift into some order, or disorder, or revolutionary economic dream. If we plan and work to adapt to new conditions in the principles of individual liberty freedom of opportunity and justice to all, we might evolve a system

Mrs. Goodner, representing **STANDARD BRANDS** will demonstrate in this store during the **COOKING WEEK** commencing August 6th.

You may leave your gifts for the **RED CROSS AUCTION** (which takes place on Saturday) at this store and we will have same delivered to the G.H. Patrick residence Saturday morning.

STRATHMORE TRADING COMPANY

A. D. SHRIMPTON, MGR.

NATIONAL STOCK TAKING NEEDS NATIONAL REGISTRATION

CANADA CALLS upon all her citizens, regardless of nationality, male and female, over 16 years of age, to register on August 19th, 20th, or 21st. Registration offices will be open from 8 a.m. to 10 p.m.

The object of this registration is to ascertain the human resources of the nation so that they may be mobilized to enable Canada to make her maximum effort in the defence of this country and towards the successful prosecution of the war.

Here are the questions you will be asked to answer. The card for women will be similar but subject to certain necessary variations. Study the questions carefully now so that you may be ready to give full and complete answers to the registration office.

REGISTRATION DATES:- AUGUST 19th, 20th and 21st

Date of Registration	1940	ELECTORAL DISTRICT No.	Name	POLLING DIVISION No.	Home, if any	CARD No.
Month	Day	Year				
1. Surname (Write in block letters) Oliver Thomas						
2. Permanent Postal Address (If away from usual residence when filling in card give name of usual residence)						
Street and Number Rural Route and Post Office Town or City Province						
3. Age last birthday Date of Birth Year Month Day						
4. Conjugal condition: Single Married Widowed Divorced						
5. Of what dependents (if any) are you the sole support—						
(a) Father (b) Mother (c) Wife (d) Number of children under 16 years (e) Number of other dependents (f) Do you contribute partial support to any one						
6. Country of (a) Yourself (b) Your father (c) Your mother						
7. Nationality or country of allegiance—British subject (a) by birth (b) by naturalization (c) Foreign citizen (d) If naturalized, in what year (e) In what place (f) If not British subject, to what country do you owe allegiance (g) If an immigrant, in what year did you enter Canada?						
8. Marital status						
9. Language or languages (a) Do you speak English? (b) French? (c) What other language can you speak, read and write?						
10. Education: (a) Primary only (b) Primary and Secondary (c) Vocational Training (Business College, Technical High School) (d) College or University Degree						
11. Is your general health (a) good? (b) fair? (c) bad? 12. If blind, deaf, dumb, crippled or otherwise physically disabled, state nature of disability.						
If permanently disabled, are you in receipt of a pension? In respect of War Service? Workmen's Compensation? Old Age or Widow's? Other (specify)						
13. Class of occupation: (a) Are you an employer of labour other than domestic? If so, state business. (b) Are you working on your own account, not employing labour? If so, state business. (c) Are you an employee? (1) working at usual occupation (2) working at other than usual occupation (3) unemployed. (d) Not working because pensioner, dependent, retired, independent means. (e) Occupation or Craft— (f) Present occupation? (g) What is your regular occupation? (h) What other work can you do well? (i) If an employee, who is your present employer? Name Address (state province) (j) If experienced in a skilled industrial occupation or profession, describe specifically the type or types of work in which you are specially equipped by training or experience.						
14. Unemployment: (a) How many weeks did you work in the past 13 months? (b) If out of work now, state number of weeks since last employed in any occupation other than work performed in return for direct relief. (c) Are you totally unskilled for employment?						
15. Were you brought up on a farm? (a) Until what age? (b) Have you worked on a farm? (c) How long? (d) In what province or country? (e) Can you handle horses? (f) Drive a tractor? (g) Use farm machinery? (h) Can you milk? (i) Are you able to do other farm work?						
16. Is there any particular occupation in which you would like to be specially trained?						
17. Defence Services: (1) Have you previously served in any Naval, Military or Air Force? If so, state: (a) Forces of what country? (b) Approximate dates between which services performed. (c) Unit (d) Rank held (e) If retired or discharged, give reasons therefor. (f) Have you been rejected for military service in the present war? (g) Why? (h) Where?						

This is Your Opportunity to Help in The National Effort. To keep the cost of this registration at a minimum the Government is asking the co-operation of all public-minded citizens in the work of registration. You can help by getting in touch with your local registration officials and offering your services.

WHERE TO REGISTER

Registration offices are being set up by electoral districts in the same manner as in the last Dominion election. Registrants are required to register in the regular polling subdivisions of their own constituencies. But should a registrant be in some other province or district out of the regular polling subdivision on Registration Day, he or she may register at any registration office convenient, upon satisfactory explanation to the local deputy registrar.

Penalty for Non-Registration — Failure to register will make any male or female, married or single, over the age of 16 years, liable to a fine not exceeding two hundred dollars, or to imprisonment for a term not exceeding Three months, or to both such fine and imprisonment, and moreover to a further penalty not exceeding Ten dollars for each day, after the day upon which he should have registered, during which he shall continue to be unregistered.

Your Registration Certificate

To every person answering the questionnaire fully and satisfactorily a certificate of registration will be issued by the local deputy registrar. This is a small card which must be carried on the person at all times.

 Minister of National War Services

Nightingale

Mr. and Mrs. R. M. Manning and Mr. C. R. Gladden were dinner guests of Mr. and Mrs. Black of Strathmore on Sun.

In spite of the inclement weather the Nightingale W.I. held the regular meeting on Thursday at the Hall. Ten members and two visitors were present, but the speaker from Calgary, Mrs. F. C. Grevett, was unable to attend. After the business was concluded, a pleasant hour was spent over the tea.

REGISTRATION DATES — AUGUST 19, 20, '41

ALL CITIZENS, MALE or female, over the age of 16 will go to the registration booths to answer their country's call — by answering the prescribed questions.

We are at war. Registration simply means organization for greater effort — for Victory. The standard on another page publishes this week a list of the questions to be submitted, so that all may go to the registration booths prepared to answer the questions promptly, in later issues we will give a list of the polling booths to be used.

Registration must be and will be a spontaneous and national effort. It is marshalling the full force of the nation: human, material and spiritual.

We must check listless before it crushes the glorious future that awaits Canada, fully developed on the high out plate of freedom, liberty, moral and spiritual achievement.

THE BERE AND YELLOW LEAF

We have been thinking off and on all week about Shirley Temple, who has retired at eleven with three million dollars. By almost any standards Miss Temple has already lived a full life. She was the greatest box office attraction of her time; she was on intimate terms with many powerful and fascinating people, including Bill Robinson and the President of the United States; she is fashionable and well established manners; her biography was printed in the Saturday Evening Post; her political opinions were even discussed in Congress. To a certain extent, we are sorry for her now, since it is not going to be easy for her to adjust herself to the quiet rhythm of the classroom. We are even more sorry for her teachers. Miss Temple has a great deal of first hand experience that will make her a tough one to impress with what usual facts and legends. A young woman who has grossed twenty million dollars at the box office in five years is not going to think very highly of Napoleon, who could get only fifteen for the entire Mississippi basin. A girl who was accused of trying to overthrow the government before she was ten may easily wonder what was keeping Joan of Arc "foolish," we can hear her say, on learning that Juliet was full fourteen.

"That bag!"

— 1941 —

"Where ya from?"

"Chicago."

"Check ya are! Know Bert Downing?"

"New."

"Stumpy. Know Johnny Billings?"

"New."

"Bill Jacobs?"

"New."

"Well maybe you live in Chicago, but it's a cinch you ain't been around much."

On Sunday afternoon, three ball games were played at Nightingale. The first, between Nightingale and Rockyford girls ended in a win by the visitors of 14 runs to 1. The home team was outclassed but it is to be congratulated on proving themselves to be good losers. In the second game, between Nightingale and Strathmore, the Nightingale boys won by 7 runs to 4. In the final game the tables were turned and after eleven innings, of play, the visiting team won by 2 runs to 1.

Quite a crowd turned out to watch the games and hope to see more of them before the summer is over.

The Rev. Leslie Pearson and Mrs. Pearson were luncheon guests of Mr. and Mrs. Walter Mercer on Sunday after the morning service.

Mrs. Carlson and family are enjoying a motor trip, expecting to visit Banff, Jasper and Edmonton before returning home.

Mr. and Mrs. Lambert Parr of Air-drie, were Nightingale visitors on Sunday.

Miss Peggy Mercer and a friend from Calgary are visiting at the home of Mr. and Mrs. Albert Mercer.

Word has been received that Jack Stoodley is at Camp Borden.

Henry Walls is bereaved by the death of his father which occurred in Three Hills Monday. The funeral was held at Three Hills, Wednesday, July 31.

A post card post-marked Quebec was received this week from Dick Stoodley and at the end were these words: "We're off!"

FALL RYE FOR PASTURE
(Experimental Farm News)

Fall rye has proved to be one of the best crops for early spring pasture. Seeded as early as August 1st, fall rye will usually provide some fall pasture that year, but if seeded later than September 15th it should not be given until the following spring, states F. S. Newbold, Division of Forage Plants, Dominion Experimental Farms Service.

Fall rye seeded alone in the spring is not a very good supplementary pasture to a permanent summer pasture but if seeded in a mixture with oats, it will produce good yields of nutritious and palatable forage. At first, the bulk of the forage will be oats, although even at that time the fall rye will give a good "bottom" to the pasture. If not grazed too close, fall rye will continue to supply considerable pasture until freeze-up.

The use of fall rye for early spring pasture is becoming increasingly popular. In experiments conducted at most Branch Experimental Stations and at Ottawa, fall rye has provided from two to four weeks of early spring pasture, if judiciously handled, and was ready at least two weeks before other pastures could be grazed.

Following early spring pasture the land may be plowed, cultivated and seeded to other crops such as wheat, millet, Sudan grass or rape. In this way it is possible to grow fall rye or pasture without seriously changing the usual crop rotation.

Fall rye should be seeded at 1 1/2 to 2 bushels if seeded alone or at 1 bushel if seeded in a mixture with 2 bushels of oats per acre. The varieties recommended are M. C. 514, Rosen and Crown for the very earliest pastures.

The basic reforms that were needed then will be needed when peace comes. Meanwhile it behooves all to stick to first principles. We believe we can help in convincing the average citizen in city and town, East and West, that first principles more surely than any other will help us all to life, liberty and the pursuit of happiness.

Local News Items

Mr and Mrs Broom of Vancouver, B. C. were week end guests of Mr and Mrs C. F. Nichol.

Mrs Barnes after visiting her daughter Mrs E. N. Biley for several weeks left Thursday for Nelson, B. C. where she will be the guest of her daughter Mrs Haylock and family.

Mrs Leslie Pearson was a delightful hostess Friday afternoon when she entertained at Tea in honor of Mr Pearson's mother and sister, Mrs David Pearson and Mrs F. L. Read.

Mrs Pearson, Sr. and Mrs Read left Saturday for their home inshaw, Alberta.

Heavy rains prevented the meeting of the Wheatland School Board Division being held Thursday of last week the meeting being postponed to Friday August 2nd.

A complete report of Teachers and their respective schools for the Wheatland District, will be published in The Standard in the third or fourth week of August.

St. Michael's Church held their annual Sunday School Picnic at St. George's Island Tuesday. A thoroughly happy outing was enjoyed by all. The many varied types of animals, both modern and ancient were a source of great interest to the children.

Mrs. W. Wilkinson is spending the month in Vancouver with her daughter.

Mr. and Mrs. McConnell, who have been staying at Mrs. Lombard's, are moving in this week to the house formerly occupied by Mr. Bishop.

Rev. Stanley Hunt will attend the School of Religion held 11 miles west of Calgary.

A letter received from Rundle Hill, Alberta states that he is now at Camp Shilo.

Overheard at the dance at Nightingale last Friday: "That Strathmore team is sure a dandy team to play ball with."

D. J. MacLean is the Demonstrator of Strathmore in the house, 5010 Shilburn Street, commencing Aug. 5.

The free use of the room given by Arthur Lambert in his store for the convenience of the Red Cross Society is very greatly appreciated by the ladies. This is a very generous donation on the part of Mr. Lambert, and it is a very convenient location.

SEARLE PRECIPITATION REPORT

Compiled from the records of 591 Government and Searle Rain Gauges. It usually proved another case of one last look.

Besides being equipped with nature's telegraph, the antelope has another claim to scientific distinction. It is the sole member of a special family found nowhere else in the world. Like the cattle tribe, it has hollow horns, but unlike them, it sheds the outside sheath every year in the same manner in which the mouse and deer shed their antlers. With the latter, however, the whole horn is dropped, while in the case of the antelope the outer sheath only is shed. The inner core, situated directly over the eye, remains and gives rise to a new horn which is pronged, hence the name pronghorn.

While during the past week considerable rains fell over large areas in the Prairie Provinces, yet the average amount of rain which fell was not much greater than the normal, so that the total moisture condition of the Prairie Provinces, as a unit, is still only 81 per cent of the longtime normal, as compared with 80 per cent last week, and 111 per cent at this time a year ago. This is all calculated by adding the rains which fell during the present growing season from April 1st to July 15th, to the precipitation which occurred during the past full months of August, September and October.

The total moisture condition in Alberta is now 70 per cent, as compared with 88 per cent last week and 100 per cent a year ago. The similar total moisture condition in Saskatchewan is now 75 per cent of normal, as compared with 74 per cent last week, and 121 per cent a year ago.

The similar total moisture condition in Manitoba is now 89 per cent of normal, as compared with 89 per cent last week, and 116 per cent a year ago. With the exception of the Emerson District, where better than normal rains fell, most areas in Manitoba have barely held their own during the week, but northwestern Manitoba still lacks moisture for a normal crop. In Saskatchewan Crop Districts 6 and 7 show a decided improvement in the area around and south of Regina, and large districts in northern and central areas are lacking moisture to the extent that crops are beginning to suffer. In Alberta Crop Districts 7, 8, 9, 10 and 11 have improved greatly during the week, but there are still districts here and there in the eastern part of the province, which must have no moisture if a full normal or average crop is to be harvested.

Previous attempts to breed the antelope in captivity had met with little success owing to the effects of the shock of capture, and it was believed

that here and there in the eastern part of the province, which must have no moisture if a full normal or average crop is to be harvested.

PRONGHORN ANTELOPE PARK IN EMISKAN NATIONAL PARK OR THE FIRST TELEGRAPH

Man may flatter himself that he was the first inventor of the telegraph for flash communication — but he is wrong. The pronghorn antelope has been using this form of signalling for perhaps thousands of generations before it was dreamed of by mankind. You have only to visit Nemiskam National Park, in southern Alberta, where more than 70 of these beautiful but timid creatures are enjoying sanctuary, to realize what an effective danger signal nature has provided for them.

The telegraph consists of white rump-patches composed of hair graded from short in the centre to long at the outside edges. Under the skin of each patch is a circular muscle, by means of which the hair can in a moment be raised and spread radially into two great, blooming chrysanthemums more or less flattened at the centre. In the bright sunlight these "patches" flash far across the open prairie, giving the alarm signal to other members of the herd and warning them of the presence of an intruder. At once the whole herd speeds across the prairie, and with this good start, few, if any, enemies can overtake them.

Undoubtedly this method of communication has been of great service to the species, for the natural range of the pronghorn antelope is usually the open prairie where there is little or no cover. About 1914 the rapid decline in the numbers of the antelope in Canada was brought to the attention of the Dominion Government and the necessary steps for their protection were taken.

Previous attempts to breed the antelope in captivity had met with little success owing to the effects of the shock of capture, and it was believed

that here and there in the eastern part of the province, which must have no moisture if a full normal or average crop is to be harvested.

There is no other tobacco JUST LIKE OLD CHUM

that only in a large area where they are unaware of their confinement would the antelope survive in numbers. The original herd in Nemiskam Park, which numbered 41 head, was secured through the simple method of building a strong wire fence around them with the minimum of disturbance. There are still a number of antelope outside this enclosure contemplating with natural curiosity their more fortunate brethren within the park. Sometimes, by methods that any stockman will readily understand, the Warden, by the adjustment of fences, is able to grant admission to many of these applicants for sanctuary.

To the antelope's innate curiosity may be ascribed his greatest danger of destruction. At the first sight of
